–Alphabetical Author Index

Tables of Contents
Corrosion, Vol. 27, 1971

January

Dissolution Behavior of Fe-Fe_3C Structures as a Function of pH, Potential, and Anion—An Electron Microscopic Study
C. J. Cron, J. H. Payer, and R. W. Staehle 1

An Investigation of Anodic Behavior of Low Alloy Steels
G. Bombara and G. Agabio 26

Factors Influencing the Corrosion of Boiler Steels in Municipal Incinerators
Paul D. Miller and Horatio H. Krause 32

Inhibition of Methanol Cracking of Ti-6Al-4V Foil: Effect of Pretreatments with Aqueous Solutions of Electrolytes
E. G. Haney and Paul Fugassi . . .46

Use of Precracked Specimens in Selecting Heat Treatments for Stress Corrosion Resistance in High Strength Aluminum Alloys
M. V. Hyatt 49

February

Characteristics of Tantalided and Hafnided Samples in Highly Corrosive Electrolyte Solutions
I. F. Danzig, R. M. Dempsey, and A. B. La Conti 55

Stress Corrosion Cracking of 304L Austenitic Steel and the Martensite Transformation
S. S. Birley and D. Tromans 63

Solid Cadmium Embrittlement: Steel Alloys
D. N. Fager and W. F. Spurr 72

Stress Corrosion Cracking of Ti-8Al-1Mo-1V Alloy: Aqueous and Methanol Environments
C. M. Chen, F. H. Beck, and M. G. Fontana 77

Computer Simulation of Stress Corrosion Cracking
Bruce D. McLaughlin 84

March

Effect of H_2S on Differential Aeration Cells with AISI 4340 Steel Electrodes
M. Inam Khokhar, P. Fugassi, and E. G. Haney 91

Interpretation of the Second Anodic Current Maximum on Polarization Curves of Sensitized Chromium Steels in H_2SO_4
M. B. Rockel 95

Technical Note: Effect of Cold Work on Intergranular Corrosion of Sensitized Stainless Steel
C. S. Tedmon, Jr., D. A. Vermilyea, and D. E. Broecker 104

Electrochemical Behavior of Homogeneous Pb-Tl Alloys in 1N H_2SO_4
J. W. Johnson, P. J. Aragon, and W. J. James 107

Technical Note: Grain Boundary Grooving of Type 304 Stainless Steel and Armco Iron Due to Liquid Sodium Corrosion
Hans U. Borgstedt 113

Interpretation of Some Hydrogen Embrittlement Phenomena
W. Beck, P. K. Subramanyan, and F. S. Williams 115

Intergranular Corrosion in High Purity Ferritic Stainless Steels: Effect of Cooling Rate and Alloy Composition
Robert J. Hodges 119

April

Perspectives on Corrosion of Materials 1970 Edward DeMille Campbell Lecture
Mars G. Fontana 129

Corrosion of Alkaline Earth Fluorides in High Temperature Chlorination Atmospheres
Danton L. Paulson and Laurance L. Oden 146

Observations of Hot Saline Water Corrosion of Aluminum Alloys
A. C. Fraker and A. W. Ruff, Jr. . 151

Embrittlement of Ti-7Al Binary Alloy in Sea Water
Joseph L. Cavallaro and Roy C. Wilcox 157

Intergranular Corrosion in High Purity Ferritic Stainless Steels: Isothermal Time-Temp Sensitization Measurements
Robert J. Hodges 164

Technical Note: Passivity of Electrodeposited Sn-Co Alloy
Y. Tsuji and M. Ichikawa 168

Clarification of De-Alloying Phenomena
R. H. Heiderbach 170

May

Observations and Thoughts on Stress Corrosion Mechanisms—ASTM 1970 Gillett Memorial Lecture
N. A. Nielsen 173

Stress Corrosion Properties of High Strength, Precipitation Hardening Stainless Steels
C. S. Carter, D. G. Farwick, A. M. Ross, and J. M. Uchida . . 190

On the Chemistry of the Solution at Tips of Stress Corrosion Cracks in Al Alloys
A. J. Sedriks, J. A. S. Green, and D. L. Novak 198

Electrochemical Evaluation of Resistance of Stainless Alloys to Chloride Media
R. P. Jackson and D. van Rooyen 203

ECM Behavior of Steel in $NaClO_4$ Electrolytes
James P. Hoare, Kao-Wen Mao, and Augustine J. Wallace, Jr. . . 211

Stress Corrosion Cracking Along Zero Isoclinics
B. C. Syrett and L. P. Trudeau . . 216

June

Review of Literature on Pitting Corrosion Published Since 1960
Z. Szklarska-Smialowska 223

Crevice Effect During Polarization of Ti-8Al-1Mo-1V Alloy in Aqueous and Methanol Environments
C. M. Chen, F. H. Beck, and M. G. Fontana 234

Technical Note: Effect of Benzoate and Chloride Ions on Passive Iron in Alkaline Solutions
O. Lahodny and Ken Nobe . . . 239

Corrosion of Iron in Hydrochloric Acid
Edward B. Butler and J. J. Frost 241

Polarization Admittance Study of Lithium Corrosion in Propylene Carbonate Solutions
J. C. Cessna 244

Intergranular Corrosion Resistance of Carpenter 20Cb-3
M. Henthorne and T. A. DeBold 255

July

Anodization of Aluminum in Phosphate and Carbonate Solutions
S. Darwish 265

Stress Corrosion Cracking in 18% Ni (250) Maraging Steel
B. C. Syrett 270

Exploratory Studies of the Movement of Activated Corrosion Products
D. H. Lister, D. H. Charlesworth, and B. D. Bowen 281

Benzotriazole as Corrosion Inhibitor for Copper
Florian Mansfeld, Tennyson Smith, and E. P. Parry 289

Technical Note: A Modified Electrochemical Expression for Corrosion Rate Measurements
Discussion by M. Stern 294

Oxidation of 21Cr-6Ni-9Mn Stainless Steel in Molten Lead Oxide and Static Air
Discussion by Lawrence R. Scharfstein 295

Ammoniacal Stress Corrosion Cracking of Alpha-Brass
Stuart S. Birley and Desmond Tromans 297

Technical Note: A Reference Electrode for Corrosion Studies in Aqueous Solutions at Temperatures to 289 C
Maurice E. Indig and David A. Vermilyea 312

August

Ellipsometric-Potentiostatic Studies of Steel Corrosion: Oxide Film Development and Effects of Inhibitors
B. J. Bornong and P. Martin, Jr. 315
Effect of Complex Cupric Ions on the Stress Corrosion Behavior of Copper-Germanium Solid Solutions
G. Bhide and R. A. Dodd 320
Mechanism of Cracking of High Strength Martensitic Stainless Steels in Sodium Chloride Solutions
B. E. Wilde 326
Transgranular Stress Corrosion Cracking of Solution Treated and Quenched Mg-8.6 Al Alloy
Greg Oryall and Desmond Tromans 334
Effect of Oxygen on Niobium-Sodium Compatibility
R. L. Klueh 342
Quantitative, Rapid Determination of Steel Surface Treatment Coverage
I. M. Hekal and G. K. Korpi . . . 347
Lithium Hydroxide Effects in the Potentiostatic Passivation of Mild Steel at 300 C
R. L. Jones and E. W. Steinkuller 353

September

Crystallography and Kinetics of Stress Corrosion Cracking in Type 316 Stainless Steel Single Crystals
M. Marek and R. F. Hochman 361
Stress Corrosion Crack Propagation and Cathodic Protection in Medium Strength Aluminum-Zinc-Magnesium Alloys
D. Eurof Davies, J. P. Dennison, and M. L. Mehta 371
Carbide Sensitization and Intergranular Corrosion of Nickel Base Alloys
C. S. Tedmon, Jr. and D. A. Vermilyea 376
Polarization of Copper in Acidic and Alkaline Solutions
C. P. Kim and Ken Nobe 382
Technical Note: Analysis of Stress Corrosion Testing of 2014-T651 Aluminum, Using Weibull Techniques
Mitchell O. Locks 386
Corrosion of 18Ni 180 and 18Ni 200 Maraging Steels in Chloride Environments
N. Kenyon, W. W. Kirk, and D. Van Rooyen 390

October

Dissolution of Iron in Sulfuric Acid Solutions
Walter E. Reid, Jr. 407
An Electrochemical-Statistical Study of Mild Steel Corrosion Inhibition in Oxygen Containing Environments
R. A. Legault, S. Mori, and H. P. Leckie 418
Technical Note: Scanning Electron Microscopic Observation of Fracture Surface of Austenitic Stainless Steels in Stress Corrosion Cracking
Hideya Okada, Yuzo Hosoi, and Seizaburo Abe 424
Effect of Various Modes of Loading on the Stress Corrosion Cracking of a Maraging Steel
H. W. Hayden and S. Floreen 429
Technical Note: On the So-Called Linear Polarization Method for Measurement of Corrosion Rates
Keith B. Oldham and Florian Mansfeld 434
Area Relationships in Galvanic Corrosion
Florian Mansfeld 436
Further Studies Defining the Aqueous Corrosion Performance of a Zirconium-Niobium-Copper Alloy
Stanley Kass 443

November

Characteristics of Localized Corrosion of Steel in Chloride Solutions
Antoine Pourbaix 449
Technical Note: Mathematical Simulation of Stress Corrosion Cracking
B. D. McLaughlin 455
Anodic Polarization Behavior of Ni-Al Alloys in Sulfuric Acid Solutions
Wesley B. Crow, James R. Myers, and Bernard D. Marvin 459
Technical Note: Diffusivity and Solubility of Hydrogen in Ti-5Al-2.5Sn Alloy at 70 C
A. H. Dexter, R. G. Derrick, and M. R. Louthan, Jr. 466
Technical Note: Tafel Slopes for Iron Corrosion in Acidic Solutions
Sidney Barnartt 467
Observations on the Stress Corrosion Crack Propagation Characteristics of High Strength Steels
C. S. Carter 471
Discussion of Technical Note: Grain Boundary Grooving of Type 304 Stainless Steel and Armco Iron Due to Liquid Sodium Corrosion
J. Hopenfeld and W. M. Robertson 478
Technical Note: An Electronic Zero Resistance Ammeter with Instantaneous Null Characteristics
W. D. Henry and B. E. Wilde . . . 479
Electrochemical Behavior of High Purity Aluminum in Chloride Containing Solutions
G. A. DiBari and H. J. Read . . . 483

December

Use of Electrochemical Hysteresis Techniques in Developing Alloys for Saline Exposures
Ellis D. Verink, Jr. and Marcel Pourbaix 495
Activation of Passivated Steel in Sodium Chromate Solution Containing Sodium Chloride
K. S. Rajagopalan and K. Venu 506
Passivation of Nickel Monocrystal Surfaces
R. M. Latanision and H. Opperhauser 509
Discussion: Oxidation of 21Cr-6Ni-9Mn Stainless Steel in Molten Lead Oxide and Static Air
A. E. Nehrenberg 516
Stress Corrosion Cracking Behavior of Maraging Steel Composites
S. Floreen, H. W. Hayden, and N. Kenyon 519
Observations on Sustained Load Environmental Crack Growth of a Titanium 8Al-1Mo-1V Alloy
R. J. Bucci and P. C. Paris 525
Mechanism of High Temperature Embrittlement and Loss of Corrosion Resistance in AISI Type 446 Stainless Steel
J. J. Demo 531

Alphabetical Subject Index
Corrosion, Vol. 27, 1971

A

ACID
- Acidic and alkaline solutions, polarization of copper in, Sept 382
- Borate-boric buffer solutions, film development on mild steel in, Aug 315
- Ferric sulfate-sulfuric acid testing of Carpenter 20Cb-3, Jun 255
- Hydrochloric, corrosion of iron in, Jun 241
- Hydrochloric, used as electrolyte media to determine chemical and electrochemical corrosion rates of tantalided and hafnided samples of nickel and AISI Type 316 stainless steel, Feb 55
- Hydrochloric, used in dezincification of beta brass, Apr 170
- Iron corrosion in acidic solutions, Tafel slopes for, Nov 467
- Nitric-hydrofluoric acid testing of Carpenter 20Cb-3, Jun 255
- Nitric, used as electrolyte media to determine chemical and electrochemical corrosion rates of tantalided and hafnided samples of nickel and AISI Type 316 stainless steel, Feb 55
- Phosphoric, used as electrolyte media to determine chemical and electrochemical corrosion rates of tantalided and hafnided samples of nickel and AISI Type 316 stainless steel, Feb 55
- Sulfuric, 1N, electrochemical behavior of homogeneous Pb-Tl alloys in, Mar 107
- Sulfuric, 1N, interpretation of second anodic current maximum on polarization curves of sensitized chromium steels in, Mar 95
- Sulfuric, dissolution of iron in, Oct 407
- Sulfuric solutions, anodic polarization behavior of Ni-Al alloys in, Nov 459
- Sulfuric, used as electrolyte media to determine chemical and electrochemical corrosion rates of tantalided and hafnided samples of nickel and AISI Type 316 stainless steel, Feb 55

Activated corrosion products, exploratory studies of movement of, Jul 281

Alkaline solutions, effect of benzoate and chloride ions on passive iron in, Jun 239

Alkaline solutions, polarization of copper in acidic and, Sept 382

Alpha-brass, ammoniacal stress corrosion cracking of, Jul 297

ALUMINUM
- Alloy 7075, resistance to stress corrosion crack propagation, Jan 49
- Anodic oxide, growth of on, Jul 265
- Anodization of in phosphate and carbonate solutions, Jul 265
- Carbonate solutions, and phosphate, anodization in, Jul 265
- Chemistry of solution at tips of cracks in, May 198
- High purity, electrochemical behavior of in chloride containing solutions, Nov 483
- High strength alloys, use of precracked specimens in selecting heat treatments for stress corrosion resistance in, Jan 49
- Hot saline water corrosion of alloys of, Apr 151
- Magnesium addition to in hot salt water, Apr 151
- Magnesium addition to in hot salt water, Apr 151
- Manganese addition to in hot salt water, Apr 151
- Ni-Al alloys in sulfuric acid solutions, anodic polarization behavior of, Nov 459
- Nickel addition to in hot salt water, Apr 151
- Phosphate and carbonate solutions, anodization in, Jul 265
- Stress corrosion cracking of, chemistry of solution at tips of cracks in, May 198
- Stress corrosion crack propagation and cathodic protection in medium strength aluminum-zinc-magnesium alloys, Sept 371
- Use of precracked specimens in selecting heat treatments for stress corrosion resistance in high strength alloys, Jan 49

Ammeter, electronic zero resistance with instantaneous null characteristics, Nov 479

Ammoniacal stress corrosion cracking of alpha-brass, Jul 297

Anion, dissolution behavior of Fe-Fe_3 structures as a function of, Jan 1

Anodic behavior of low alloy steels, an investigation on, Jan 26

Anodic dissolution and crack blunting, Oct 429

ANODIC POLARIZATION
- Aluminum-nickel alloys in sulfuric acid solutions, behavior of, Nov 459
- Anodic protection, Apr 140
- Experiments with mild steel, Aug 353
- Low alloy steels, behavior of, an investigation on, Jan 26
- Nickel-aluminum alloys in sulfuric acid solutions, behavior of, Nov 459
- Pb-Tl alloys in 1N H_2SO_4 using potentiostatic and galvanostatic techniques, Mar 107
- Tafel slopes for iron corrosion in acidic solutions, Nov 467

Anodization of aluminum in phosphate and carbonate solutions, Jul 265

Aqueous corrosion performance of a zirconium-niobium-copper alloy, Oct 443

Aqueous solutions at temperatures to 289 C, reference electrode for corrosion studies in, Jul 312

Area relationships in galvanic corrosion, Oct 436

Austenitic stainless steels, exposed to boiling, aqueous magnesium chloride solution, crystallography, morphology, and kinetics of, Sept 361

B

Benzoate and chloride ions, effect of on passive iron in alkaline solutions, Jun 239

Benzotriazole, corrosion inhibitor for copper, Jul 289

Bicarbonate solution, used to evaluate anodic behavior of low alloy steel, Jan 26

Bisulfate solution, used to evaluate anodic behavior of low alloy steel, Jan 26

Boiler steels in municipal incinerators, factors influencing corrosion of, Jan 31

C

Cadmium embrittlement: steel alloys, Feb 72

Cadmium surface diffusion, rate controlling step in solid cadmium embrittlement in steel alloys, Feb 72

Calcium chloride, fracture surface of austenitic stainless steels in stress corrosion cracking in, Oct 424

Carbide sensitization and intergranular corrosion of nickel base alloys, Sept 376

Carbonate solutions, phosphate and, anodization of aluminum in, Jul 265

CATHODIC POLARIZATION
- Aluminum-zinc-magnesium alloys, stress corrosion crack propagation and cathodic protection in medium strength, Sept 371
- Cathodic protection of U-bends in 18Ni 180 and 18Ni 200 maraging steels, Sept 390
- High silicon iron anodes for cathodic protection, Apr 141
- Protection in medium strength aluminum-zinc-magnesium alloys, stress corrosion crack propagation and, Sept 371
- Tafel slopes for iron corrosion in acidic solutions, Nov 467

Cells, differential aeration, with AISI 4340 steel electrodes, effect of H_2S on, Mar 91

Chloride containing solutions, electrochemical behavior of high purity aluminum in, Nov 483

Chloride ions, effect of benzoate and, on passive iron in alkaline solutions, Jun 239

Chloride media, electrochemical evaluation of resistance of stainless alloys to, May 203
Chloride required for passive film breakdown at a fixed passive potential for stainless steel, May 203
Chloride solutions, localized corrosion of steel in, Nov 449
Chlorination atmospheres, corrosion of alkaline earth fluorides in, Apr 146
Chlorine, accumulation in municipal incinerators, Jan 31
Chromium content at equilibrium with chromium carbide particles and a matrix containing Ni-10Fe-16Cr for varying carbon contents and heat treatments, Sept 376
Chromium steels in 1N H_2SO_4, interpretation of second anodic current maximum on polarization curves of sensitized, Mar 95
Computer simulation of stress corrosion cracking, Nov 455
Copper, accumulation in municipal incinerators, Jan 31
Copper, benzotriazole as corrosion inhibitor for, Jul 289
Copper in acidic and alkaline solutions, polarization of, Sept 382
Copper oxide, presence of in stress corrosion cracking of alpha-brass, Jul 297
Copper-zirconium-niobium alloy, aqueous corrosion performance of, Oct 443
Corrosion rate measurements, a modified electrochemical expression for, Jul 294
Crack growth of a titanium 8Al-1Mo-1V alloy, Dec 525
Crevice corrosion, Apr 131
Crevice corrosion of stainless steel in chloride media, May 203
Crevice effect during polarization of Ti-8Al-1Mo-1V alloy in aqueous and methanol environments, Jun 234

D

Dezincification of beta brass immersed in hydrochloric acid, Apr 170
Differential aeration cells with AISI 4340 steel electrodes, effect of H_2S on, Mar 91
Dissolution behavior of mild steel related to competitive adsorption of available species onto metal surface, Oct 418

E

Electrochemical evaluation of resistance of stainless alloys to chloride media, May 203
Electrochemical expression, modified for corrosion rate measurements, Jul 294
Electrochemical hysteresis techniques used in developing alloys for saline exposures, Dec 495
Electrochemical machining behavior of steel in $NaClO_4$ electrolytes, May 211
Electrochemical-statistical study of mild steel corrosion inhibition in oxygen containing environments, Oct 418
Electrochemically produced chromium-chromium oxide and chromium phosphate coatings, used to determine steel surface treatment coverage, Aug 347
Electrodeposited Sn-Co alloy, passivity of, Apr 168
Electrodes, effect of H_2S on differential aeration cells with AISI 4340 steel, Mar 91
Electrolyte solutions, characteristics of tantalided and hafnided samples in highly corrosive, Feb 55
Electrolytes, effect of pretreatments with aqueous solutions of in inhibition of methanol cracking of Ti-6Al-4V foil, Jan 46
Electrolytes, electrochemical machining behavior of steel in $NaClO_4$, May 211
Electron diffraction techniques, used to study phases present on fracture surfaces of annealed 304L austenitic steel rods, Feb 63
Electron diffraction techniques, used to study transgranular stress corrosion cracking of solution treated and quenched Mg-8.6 wt % Al alloy, Aug 334
Electron microscopic study, dissolution behavior of Fe-Fe_3 structures as a function of pH, potential, and anion, Jan 1
Electron transmission microscopy, used in phenomenological study of dissolution behavior of an Fe-Fe_3C structure, Jan 1
Electronic zero resistance ammeter with instantaneous null characteristics, Nov 479
Ellipsometric-potentiostatic studies of steel corrosion, oxide film development and effect of inhibitors, Aug 315
Erosion corrosion, Apr 131

F

Fe-Fe_3 structures as a function of pH, potential, and anion, dissolution behavior of, Jan 1
Ferrite control, Apr 140
Fluorides, alkaline earth, corrosion of in high temperature chlorination atmospheres, Apr 146

G

Galvanic corrosion, area relationships in, Oct 436
Galvanic or two metal corrosion, Apr 131
Gamma radiation fields produced by activated corrosion products, Jul 281
Grain boundary grooving of Type 304 stainless steel and Armco iron due to liquid sodium corrosion, Nov 478

H

Hafnided samples in highly corrosive electrolyte solutions, characteristics of tantalided and, Feb 55
Heat treatments for stress corrosion resistance in high strength aluminum alloys, use of precracked specimens in selecting, Jan 49
High strength steels, propagation characteristics of, Nov 471

HYDROGEN
Diffusivity and solubility of hydrogen in Ti-5Al-2.5Sn alloy, Nov 466
Embrittlement, role in stress corrosion cracking of a maraging steel, Oct 429
Evolution of in reaction of lithium with chlorohydrins, Jun 244
Evolution of in stress corrosion cracking and embrittlement, May 173
Hydrogen absorption of martensitic stainless steel, Aug 326
Interpretation of some embrittlement phenomena, Mar 115
Role in aqueous corrosion performance of a zirconium-niobium-copper alloy, Oct 443
Saturated sulfuric acids, behavior of nickel-aluminum alloys in, Nov 459
Sulfide, effect of on differential aeration cells with AISI 4340 steel electrodes, Mar 91
Hydroxide, lithium, effects in potentiostatic passivation of mild steel at 300 C, Aug 353
Hysteresis techniques, electrochemical, used in developing alloys for saline exposures, Dec 495

I

Incinerators, factors influencing corrosion of boiler steels in, Jan 31
Inhibitors, effect of and oxide film development, ellipsometric-potentiostatic studies of steel corrosion, Aug 315
Intergranular corrosion, Apr 131
Intergranular corrosion and carbide sensitization of nickel base alloys, Sept 376
Intergranular corrosion in high purity ferritic stainless steels, Apr 164
Intergranular corrosion in high purity ferritic stainless steels, effect of cooling rate and alloy composition, Mar 119
Intergranular corrosion of sensitized stainless steel, effect of cold work on, Mar 104
Intergranular fracture of austenitic stainless steels, Oct 424
Iron corrosion in acidic solutions, Nov 467
Iron, corrosion of in hydrochloric acid, Jun 241
Iron, dissolution in sulfuric acid solutions, Oct 407
Iron dissolution, quantitative relationship between surface treatment coverage and, Aug 347

L

Lead, accumulation in municipal incinerators, Jan 31
Lead and lead thallium alloys in 1N H_2SO_4, electrochemical behavior of, Mar 107
Liquid sodium corrosion, grain boundary grooving of Type 304 stainless steel and Armco iron due to, Mar 113
Liquid sodium corrosion of Type 304 stainless steel and Armco iron, Nov 478
Lithium corrosion in propylene carbonate solutions, polarization admittance study of, Jun 244
Lithium hydroxide, effects in potentiostatic passivation of mild steel at 300 C, Aug 353
Localized corrosion of steel, breakthrough potential, Dec 506
Localized corrosion of steel in chloride solutions, characteristics of, Nov 449
Low alloy steels, anodic behavior of, Jan 26

M

Magnesium addition to aluminum alloys in hot salt water, effect of, Apr 151

Magnesium alloys, stress corrosion cracking of, May 198
Magnesium alloys, stress corrosion crack propagation and cathodic protection in medium strength aluminum, zinc and, Sept 371
Magnesium chloride, fracture surface of austenitic stainless steels in stress corrosion cracking in, Oct 424
Magnesium fluoride, comparison of corrosion characteristics with nickel, calcium, fluoride, and strontium fluoride, Apr 147
Manganese addition to aluminum alloys in hot salt water, effect of, Apr 151
Maraging steel composites, stress corrosion cracking behavior of, Dec 519
Maraging steel, effect of modes of loading on, Oct 429
Maraging steel, stress corrosion cracking in 18% Ni (250), Jul 270
Maraging steels in chloride environments, corrosion of 18Ni 180 and 18Ni 200, Sept 390
Martensite etching techniques, used to detect presence of martensite phases adjacent to stress corrosion cracks and to relate stress corrosion crack topography to morphology of martensite formation, Feb 63
Mathematical simulation of stress corrosion cracking, Nov 455
Mattsson's ammoniacal solution, stress corrosion cracking of Cu-29.38 zinc in, Jul 297

MECHANISM
- Anodic and cathodic polarization studies, Apr 137
- Application of fracture mechanics to stress corrosion studies, Apr 139
- Catchment principle, Oct 436
- Composite approach to stress corrosion crack propagation retardation in base plate and weld structures, Dec 519
- Cracking of high strength martensitic stainless steels in sodium chloride solutions, Aug 326
- Crystallography and kinetics of stress corrosion cracking in Type 316 stainless steel single crystals, Sept 361
- Diffraction techniques, Apr 139
- Effect of oxygen on niobium-sodium compatibility, Aug 342
- Electrochemical behavior of high purity aluminum in chloride solutions, Nov 483
- Electrochemical hysteresis techniques used in developing alloys for saline exposures, Dec 495
- Electrochemical oxidation, quantitative implications, Nov 455
- Electrochemical reactivity of metal specimens, a new technique for characterizing, Oct 407
- Electron-morphological, Apr 139
- Elevated temperature electrochemistry, Apr 137
- Ellipsometry, Apr 137

High temperature embrittlement and loss of corrosion resistance in AISI Type 446 stainless steel, Dec 531
Hysteresis techniques, electrochemical, used in developing alloys for saline exposures, Dec 495
Ion microprobe mass spectrometry, Apr 139
Iron corrosion in hydrochloric acid, Jun 241
Linear polarization, Apr 137
Lithium reaction with chlorohydrins, Jun 244
Mathematical simulation of stress corrosion cracking, Nov 455
Observations and thoughts on stress corrosion cracking, May 173
Pitting corrosion, effect of factors on, Jun 223
Pitting corrosion of stainless steel alloys in chloride media, May 203
Polarization admittance technique, use of, Jun 244
Release of activated corrosion products in nuclear power reactor, Jul 281
Strain electrometry, Apr 137

METALS EXCEPTIONAL
- Barium dinonylnapthalene sulfonate, effects of pre-adsorbed films of, Aug 315
- Lithium-drifted germanium gamma ray detector, Jul 281
- Molybdenum, effect of on fracture mode of austenitic stainless steels, Oct 424
- Niobium-zirconium-copper alloy, aqueous corrosion performance of, Oct 443
- Zirconium-niobium-copper alloy, aqueous corrosion performance of, Oct 443

Methanol cracking of Ti-6Al-4V foil, inhibition of, effect of pretreatments with aqueous solutions of electrolytes, Jan 46
Microscopic study, electron, dissolution behavior of Fe-Fe_3 structures as a function of pH, potential, and anion, Jan 1
Mild steel corrosion inhibition in oxygen containing environments, an electrochemical-statistical study of, Oct 418
Molybdenum, effect on susceptibility to intergranular corrosion of high purity ferritic stainless steel, Arp 164
Monocrystal surfaces, nickel passivation of, Dec 509

N

NICKEL
- Addition to aluminum alloys in hot salt water, effect of, Apr 151
- Carbide sensitization and intergranular corrosion of base alloys of, Sept 376
- Comparison of corrosion characteristics with magnesium fluoride, calcium fluoride, and strontium fluoride, Apr 148
- Dispersion hardened alloys of, Apr 142
- Maraging steel, 18% Ni (250) stress corrosion cracking in, Jul 270
- Maraging steels in chloride environments, corrosion of 18Ni 180 and 18Ni 200, Sept 390
- Ni-Al alloys in sulfuric acid solutions, anodic polarization behavior of, Nov 459
- Passivation of monocrystal surfaces, Dec 509

Niobium-sodium compatibility, effect of oxygen on, Aug 342
Niobium-zirconium-copper alloy, aqueous corrosion performance of, Oct 443

O

Optical fractography, used to study transgranular stress corrosion cracking of solution treated and quenched Mg-8.6 wt % Al alloy, Aug 334
Oxide film development and effects of inhibitors, ellipsometric-potentiostatic studies of steel corrosion, Aug 315

OXYGEN
- Effect on niobium-sodium compatibility, Aug 342
- Electrochemical-statistical study of mild steel corrosion inhibition in environments of, Oct 418
- Mild steel corrosion inhibition in, an electrochemical-statistical study of, Oct 418
- Niobium-sodium compatibility, effect of on, Aug 342
- Oxidation of 21Cr-6Ni-9Mn stainless steel in molten lead oxide and static air, Dec 516
- Oxidation of 21Cr-6Ni-9Mn stainless steel in molten lead oxide and static air, Jul 295
- Oxide film on passivated metals, structure of and effect on pitting corrosion, Jun 223
- Oxide, molten lead and static air, oxidation of 21Cr-6Ni-9Mn stainless steel in, Jul 295
- Oxide on steel anode surface, May 211
- Oxygen free and saturated solutions, electrochemical behavior of high purity aluminum in, Nov 483
- Sodium-niobium compatibility, effect of on, Aug 342

P

Passivated steel in sodium chromate solution containing sodium chloride, activation of, Dec 506
Passivation of nickel monocrystal surfaces, Dec 509
Passive iron in alkaline solutions, effect of benzoate and chloride ions on, Jun 239
pH changes of NaCl electrolyte inside a crack, Sept 371
pH, dependence of corrosion rate of copper in solutions, Sept 382
pH diagrams for alloy systems, Dec 495
pH, dissolution behavior of Fe-Fe_3 structures as a function of, Jan 1
pH, effect on mechanism and rate of pitting corrosion, Jun 223
pH, electrochemical behavior of high purity aluminum in saline solutions of varying, Nov 483
pH, formation of steady region at tips of stress corrosion cracks in aluminum alloys, May 198
pH, measurement of in pitting of steel in chloride solutions, Nov 449
Phosphate and carbonate solutions, anodization of aluminum in, Jul 265

PITTING CORROSION
- Aluminum alloys, pitting attack on, Apr 151
- Anodic dissolution products in pits, Aug 326
- Cold working, effect on, Jun 223
- Composition and structure of metal or alloy, effect on, Jun 223
- Composition of corrosive medium, effect on, Jun 223
- Determination of pitting potentials of stainless steel alloys in chloride media, May 203
- Heat treatment, effect on, Jun 223
- Methods for studying tendency to, Jun 223
- pH, effect on, Jun 223
- Pit growth, kinetics of, Jun 223
- Pitting attack on aluminum alloys, Apr 151
- Protection potential vs pitting potential for Fe-Cr alloys, Dec 495
- Review of literature published since 1960, Jun 223
